MEMO N° 8 TO BERNARD CAZENEUVE

**UNSIGNED FILE STRIVING
TO SHOW THAT THE FPR IS
RESPONSIBLE FOR THE ATTACK**

Sent by J Nemo, this unsigned file is extremely significant to the approach of certain elements.

First question: can we find the author of this memo?

With regard to the air crash, it is indicated, in the margin and by handwritten note, see “*Saint Quentin Telex*”. *Does a telex exist?*

It cites “*witness statements of inhabitants (which) strive to prove that the commando that implemented these missiles was employed from a vehicle of the UN in order to return to the site*”.

This declaration is extremely serious. *Do we have any elements to confirm this?*

It is indicated that in the night of 6th to 7th April, a message from Kagamé to his sector commandants was collected by the Rwandan armed forces, which said this: “*Victory, victory, our reinforced squadron has succeeded in its mission. The enemy army will no longer be able to be entrenched by its leader*”. It is added in the margin, by handwritten note, “*Saint Quentin telex*”. *Does another telex exist?*

If the Rwandan army collected this message, why did the memo from the Ministry of Foreign Affairs disseminated to the whole diplomatic corps on 15 April not make any mention of it, even though the content was critical, furthermore, against the FPR? *Verify the existence of these “telexes” from Saint Quentin.*

Jean-Claude Lefort
